Public Safety Equipment Division

PIPS Technology is the world leader in automatic license plate recognition systems (ALPR), with systems for on-car mobile use as well as fixed locations and special applications.

The latest technology in emergency vehicle warning equipment (lightbars, sirens) including the Legend LED lightbar. We are also a factory-authorized repair center for FS. We are Federal Signal's largest Canadian distributor.

Unitrol high quality sirens including the TouchMaster Delta. Unitrol also manufactures the "Rumbler" low frequency siren which gives added effectiveness in today's traffic situations.

Ballistic protection panels for vehicle doors, including Ford-approved panels for Crown Vic, and also panels for the Dodge Charger. We also carry PPI's line of concealed and tactical body armour and accessories.

Stinger Spike tire deflation systems are the leader in pursuit intervention technologies. There are a number of models available to suit your needs.

Equipment Consoles and laptop mounting systems for Toughbooks and other computers. Gamber-Johnson is North America's largest manufacturer of in-vehicle laptop mounting systems. 3 yr warranty on the Toughbook docks.

Bullard makes handheld thermal imaging cameras for law enforcement use. Bullard's S2 and SE35 models are waterproof, extremely rugged, simple to use, and very effective.

SafeStop devices plug-and-play into many common vehicles. They allow you to idle your vehicle without the key in the ignition, allowing you to keep your vehicle running without it being stolen. Easy to use "hands free" system.

Motorola Authorized radio equipment dealer. We are also a Motorola Authorized Service Station. We have a full lineup of antennas for all types of GPS, data, and voice systems.

Our goal is to provide you with a **one-stop solution** for your vehicle outfitting needs. In addition to the items list here, we can also provide onboard power systems (including solar, inverter, shore-power autoswitching), and antenna systems for any requirement.

No other facility in western Canada can match the complete line of vehicle equipment and technology that we carry.

You can have your entire vehicle completed with one stop! We also have **experience with hybrids and other special vehicles**. We can help you accomplish your goals, or solve problems in your fleet, including how to set your fleet up for 'no idle' policies and bylaws.

We have professional **installation facilities in Victoria and north Surrey**, and installation partners across Canada.
